# Microfibre Floor Mops

Chicopee® True Confidence™

## Short term use Microfibre mops for increased hygiene

Wet floor mopping has changed a lot since the original string mops. Flat mopping and the increasing use of microfibre based mops has increased effectiveness, reduced time and lowered chemical consumption. We have a range of products dependent on your cleaning routine and area. The Chicopee Microfibre Mop Light and Economy are specially designed for our Fluid Mopping System.

# Microfibre Floor Mops

Reduce cleaning time & removes the need for laundry

## Designed for use with the Fluid Mopping System

### Attach the mop

Simply place the mop on the floor and it will attach using the micro fastener

### Spray the floor

Pull the trigger to release cleaning liquid as required

### Clean area

Clean the desired area, remembering to pull the trigger for additional liquid

### Disposal

Once the wipe has become filled with dirt simply remove and throw away

## Problems

- Traditional mopping systems require the mop to hold a high amount of liquid, this often means a lot of liquid is released at the start and little at the end
- Traditional floor mops can contain dirt and contamination after laundering or rinsing, spreading dirt and bacteria onto the next surface and causing cross contamination
- Cleaning floors is a difficult job, the ergonomically designed Fluid Mop System, combined with our short term use mops makes the task easier without compromising on performance

## Solutions

- With the Chicopee Fluid Mopping System the water is held in a removable reservoir on the tool, and released as you need it. Removing the need for a mopping bucket and therefore reducing water consumption and the risk of spillages, while also improving hygiene practises.
- Our unique range of short term use floor mops utilise microfibre technology to help capture dirt and bacteria in the mop, while helping to reduce the risk of cross contamination by discarding after use rather than laundering.
- The Economy and Light Mops are able to clean between 50 - 100m<sup>2</sup> using the liquid on board the Chicopee Fluid Mopping System, thus allowing you to clean much larger areas than with traditional bucket impregnated mop systems.

Dirt Removal

Handle Protection

Durable & Flexible

Fluid Mop Compatible

Article Number	Quality	Sheet Size (L x W)	Sheets Per Pack	Packs Per Case	Product Type
<strong>Floor Mops</strong>					
● 74151	Light	43 x 12,5 cm	20	14	1/2 Fold
